Subject: Microsoft Settlement

I believe that the proposed settlement of the recent Microsoft case is not sufficient. Particularly in regards to the OEM part of the settlement.

I believe that OEM's should be able to put any OS they like on computers they sell without fear of reprisal from any company Microsoft or others. This should apply to OEMs of any size and Microsoft should not be able to "kickback" discounts to OEMs based on volumes of other Microsoft products sold.

Thank you for your time.
